OF THE

BOARD OF ADMINISTRATORS

OF THE

CHARITY HOSPITAL

TO THE

GENERAL ASSEMBLY OF THE
STATE OF LOUISIANA

1922

NEW ORLEANS

*3000
Back*

THE CHARITY HOSPITAL

OF LOUISIANA
WAS FOUNDED IN THE YEAR 1786
BY

DON ANDRES ALMONASTER Y ROJAS,

To whose generous endowment, the munificence of the
LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted for
the means of erecting this edifice, built in the year

1832

His Excellency A. B. Roman, being Governor and Ex-Officio
President of the Institution.

To record which and inscribe hereon the names and contributions of its
distinguished benefactors.

THIS TABLET HAS BEEN ERECTED

Etienne Bore	\$ 1,000.00	Mrs. Caroline S. Tilton
Robert Cune	1,000.00	Manuel Abascal	1,000.00
Julien Poydras, Real Es- tate	35,000.00	Graduate Nurses, Class of 1910	500.00
Nancy Davenport	500.00	F. T. Howard	10,000.00
Eugene McCarthy	600.00	Dr. J. L. Sexton	500.00
R. G. Taylor	523.00	Widow J. Hy. Boiman	1,000.00
Charles Schmidt	500.00	Neomie Victoire Brugier	500.00
John Burnside	10,000.00	Hippolyte Garrott	500.00
Charles Macready	1,500.00	Ed. Rosenberg	2,000.00
Emma Ingram, Real Es- tate	4,000.00	John Rawlins Smith	500.00
Stephen Henderson, Cotton Press Property	45,000.00	Mrs. Louis Schwartz	27,251.42
R. Y. Charnbury	1,000.00	Sidney O. Wusthoff	1,000.00
Jules Cassard	3,000.00	Frank B. Williams	500.00
Caroline E. Simms	500.00	Mrs. Sophie Gumbel	500.00
P. B. O'Brien	2,000.00	H. Aaron	500.00
Mrs. Julia Breen	1,000.00	W. R. Irby
Charlotte Piffet	1,800.00	Judge Jos. A. Breaux
Jean Ferran	3,000.00	Senator C. C. Cordill	10,000.00
Pierre Claude Samory	1,500.00	Mrs. Marie Borne	3,322.61
V. J. Wood	500.00	Eugene Lacost	50,164.39

DEPARTMENT OF BASAL METABOLISM

Chief of Service

HAMILTON P. JONES, M.D.

Annual Report of the Vice President

FRED. W. EVANS.

February 19, 1923.

Governor John M. Parker, Ex-Officio President of the Board of Administrators, Charity Hospital of Louisiana, Baton Rouge, La.

Your Excellency:

Analyzing the work accomplished by the Charity Hospital during the year 1922, one is amazed at the great strides taken, and appreciation is felt for those whose labors contributed to this progress.

Thanks must be given to the General Assembly of the State of Louisiana, for they allowed an increase in our appropriation beginning July 1st. We are also grateful to you for your efforts in securing the special appropriation of one hundred thousand dollars, part of which was used for our new clinic building, and a part for making up the deficit for the year 1921. But for these increases, some sections of the hospital would of necessity have been closed, since the increase in patients was greater than the increased appropriation as shown by an actual reduction in the per capita cost. This reduction is eight cents lower than our per capita cost in 1921, which brings it down to \$1.53. We know of no hospital in America of this size that operates under \$3.00 per patient per day.

The Superintendent's report covers all details of the hospital administration and improvements so completely that it would be but a repetition for me to review that field. However, its importance is so great that we must not fail to note the fact that the hospital is entirely equipped with automatic sprinklers. For more than five years, this need has been the principal theme of the Vice-President's reports, expressing the fears that all former boards have had of a great conflagration which have now been removed. This equipment saves the State about a thousand dollars a year in insurance premiums, and the entire cost was paid out of contributions.

The great needs of the hospital today are quarters for the internes and additional quarters for the nurses. In addition, there is a need for additional ward space. In 1921, the daily average number of patients in the hospital was 885. In 1922, the average number was 971. The daily average in January, 1923, was 1016. A few days ago there were 1164 patients in the hospital. Every few days sees a maximum number of patients in the hospital, and from this fact I am sure the daily average number of patients for the year 1923 will exceed the number in 1922. It will be imperative, then, for us to make additions to the wards, and in order to secure the funds for these additions, having been assured that the money cannot be granted us by the State, it will be necessary to go before the public at an early date to request financial assistance in these projects. We cannot but feel that our efforts in that direction will be successful as our cause is most worthy.

The attitude of a number of people toward the hospital is illustrated by the Charity Hospital Sewing Guild, of which Mrs. Harry L. Howard is president. The ladies in this organization devote several days a week to making garments, sponges, dressings and other supplies for the use of the hospital. The hospital is deeply grateful for this assistance.

Several workers have been added to the Social Service Department. We are sure that the addition of these workers to the staff will result in increased activities and benefit to the hospital.

Judging the hospital with other business enterprises with which I am connected, I can see that the Superintendent, Dr. Leake, has by his intelligent and efficient administration saved the institution many thousands of dollars. I am sure I can speak for the board in expressing our great appreciation for him. In addition to his business ability, Dr. Leake must be commended for the many improvements he has made for the benefit of the patients.

At the last session of the Legislature, our license fee law was revised, which has since increased our revenues from that source; this is largely due to careful and persistent work of our secretary-treasurer, Mr. F. W. Matthews. In all other ways he has administered his office in a careful and consistent manner, and I extend to him my hearty appreciation.

I would be remiss did I not mention the medical and surgical staff and express my appreciation for their untiring efforts in treating the patients in the hospital.

Sister Stanislaus, our Directress of Nurses, is most decidedly to be congratulated on her work in the hospital. Her management of her department is most efficient, and in every way she is an unfailing source of strength. Under her direction, the Nurses' School has grown and developed remarkably and additions have been made to the curriculum which mark a decided advance.

I wish to take this opportunity of thanking the Masons, the Elks and other fraternal organizations for their generous donations during the year. Our gratitude is especially due to the Elks, who, through the spirit of kindness for which they are noted, donated a Christmas tree to the Milliken children. This is an annual charity with the Elks which brings the spirit of Christmas to a group of the unfortunates of the world.

In conclusion, I wish to extend my appreciation to my co-workers on the board for their co-operation in all affairs of the hospital. As a body and on committees, all the members have worked steadfastly and earnestly in securing improvements and additions to the hospital. Their efforts are worthy of the utmost praise, and it is with pleasure I bring their services to your attention.

Yours respectfully,

FRED. W. EVANS,
Vice-President, Board of Administrators.

Superintendent's Report

To the Board of Administrators, Charity Hospital, New Orleans, La.

Gentlemen:

Herewith I submit to you my report for the year 1922:

BED CAPACITY OF HOSPITAL

White Male	332

Reviewing the work done by Charity Hospital during the year 1922, one is struck by a comparison with other years and a sense of genuine satisfaction felt for the great amount accomplished. A destructive critic with no other purpose than to find fault could make a lengthy report, for it is admitted many departments could be improved and our lack of funds for necessary improvements makes it impossible to render the highest efficiency of service. A close study of the Hospital, however, will show a wholesome improvement, and one of which we should all justly feel proud.

There are many factors responsible for this condition, which can be summed up in the one word, co-operation. It might not be amiss to say that at no time during the history of the Hospital has such a thorough understanding existed between the Board of Administrators, the Superintendent and the Visiting Staff. With this spirit of co-operation so firmly established, it should not be considered an unlikely prophecy to

say that Charity Hospital is destined to become one of the foremost hospitals in the country.

A striking example of the interest shown by the Visiting Staff was displayed during the past summer when a committee accompanied the Board of Administrators to Baton Rouge and appeared before the Legislature with a view to increasing the appropriation. This plea before the Legislature, while not entirely successful, did result in a substantial increase for maintenance. Looking back, we realize that it was this increase alone that made it possible to administer the Hospital at all, for the increase in patients was greater than the increase in dollars and cents, and a study of the accompanying statistical report shows an actual decrease in per capita cost. We are not proud of this decrease. In fact, it is a rather sure indication that we are not doing everything we should for our patients, since a comparison with the per capita cost of other hospitals shows that our is appreciably lower than every hospital whose statistics have been available to us.

The request for increased appropriation for improvements was not granted, and while the Board of Administrators is to be complimented on its perseverance and persistency in appearing before the State Tax Commission, the Legislature, the State Board of Liquidation and the Governor, the fact remains that no funds were provided, and unless the State appropriates the money, some form of a State campaign must be put on, for several improvements are imperative. These improvements were urged in the Superintendent's report a year ago, and the need is more keenly felt at present. A new dormitory must be provided for the internes for their present quarters are entirely inadequate. An addition must be built to the Nurses' Home; the present Home is filled to capacity, while there are needs for approximately one hundred more nurses. This is a serious condition and one not to be passed lightly. The present Home was built in 1901 and is inadequate for the needs of 1923.

The chief purpose of every hospital is to render efficient service to its patients; probably next in importance is the building of the highest possible standard of medical education. We have this dual obligation to perform, and I believe that the majority of the profession in New Orleans and in many parts of the state will acknowledge the great benefits derived from being associated with Charity Hospital, and feel that the Hospital in no little way has contributed to their skill and greatness.

As to the service to the patient, this is accomplished in two ways, first, the direct contact with the patient, and, secondly, the betterment and improvement of the hospital in ways that ultimately result in benefit to the patient. For some time there has been a feeling among the staff that a decided improvement could be made by an entire reorganization of the staff, and a reassignment of the services with a view to more concentration. With such an idea prevailing, a committee of the staff was appointed to confer with the Superintendent to outline this most difficult task. Too much praise cannot be given the committee for their painstaking and laborious efforts. No detail was too small for their consideration, and no time begrudged for the crystallization of this plan. While the work of the committee has not been completed, I am happy in the belief that a decided improvement will be the reward of their labors.

The improvements in the hospital have been many, and while most will be only briefly mentioned, some seem to be of such importance that they are worthy of description. Foremost of all is the addition to the new clinic, consisting of a third story addition to Clinic No. 1 and a new three-story annex. The building will be completed about April 1st, and will prove to be the most outstanding improvement in the last few years. This building will be used for the out-door clinic patients and in addition will have quarters for the social service department, the clinics, the

accident service, the admitting room and the clerk's office. These departments will be centralized in one building which will prove advantageous. The special feature will be the bringing together of all clinic patients in one building. Both ambulance and ambulatory accident cases will be admitted through the Howard Street entrance, relieving the condition of having patients coming through the front entrance. It is contemplated employing a unit history system and having the patients' histories accompany them when admitted to the Hospital. This will eliminate duplication of records and will amount to a considerable saving to the Hospital.

An improvement of note is the equipping of practically the entire Hospital with a sprinkler system. In addition to this precaution, fire hydrants have been placed on the Hospital grounds and engine crews of the city department have been made familiar with their location. At night red oil lanterns are hung on the hydrants so that they may be readily found should our electric light system be incapacitated. In addition to this a special bell has been installed in the nearest city fire engine house, which is only a half block away, and one in the power house so that in case of emergency every precaution has been taken. Most of our buildings are old and not fire-proof, but the Administrators should pride themselves on these precautions which have forestalled a potentially inestimable number of catastrophes. The cost of the installation comes from personal donation, so, in addition to reduced fire risk, it is a distinct saving of a considerable amount to the State on the decreased insurance premium.

A new hot water system has been installed. Besides being more efficient than the old system, it will result in a decided saving in fuel, for a central heater is now used where formerly five were employed. In summer most of the water can be heated with exhaust steam and probably at night the boilers will not be in constant use as formerly. Our boilers continue to give satisfaction and no further trouble is experienced in the burning out of arches.

Some of the improvements which might be mentioned briefly are the screening of the Nurses' Home; new plumbing, consisting of hot and cold water mains in Milliken Building; new dressing room in the Milliken; new rest room for nurses on night duty; new elevator in Milliken; tiling of doctors' dining room, plaster room and Milliken basement; tiling of diet kitchen and entire new equipment; three entirely new cystoscopic rooms; the installation of a physio-therapy department which has functioned splendidly in spite of cramped space; wood floor in Ambulance House for the drivers' dormitory; provision made for the grazing and exercising of the horses for the Pathological Department; new milk room and the installation of a Frigidair machine, which is a complete refrigerating system for the milk for the Milliken babies; the installation of flush valves in all the toilets in the Main and Milliken Buildings; the installation of several new sterilizers; new water lines to clinics; new tank for sterile water in Milliken; new screened vestibule for the entrance to the Main Building; new art dome for the Milliken; new 10x12 bake oven with an oil burning equipment. In addition, the Milliken Main Building and the exterior of the Miles Amphitheatre were painted; a new addition was made to the laundry to use for a marking room; a new dining room was made for the help.

No attempt will be made to go into details, for the different departments have submitted the accompanying reports showing the improvements made in each branch of the Hospital. It is worthy of note that there was a big increase in the work of the Pathological Department laboratory and the X-Ray laboratory. The Hay Fever Clinic doubled last year. It might be interesting to note that there were 354,633 patient days in the Hospital and a total of 133,730 visits to the out-patient clinic, making a

total which would represent 488,363 treatments for the year. This does not include the accident service in the Miles Amphitheatre.

A year ago it was prophesied that in a short time an occupational therapy department would be in operation here. Plans are still going forward for this department, and a worker is being trained along the most advanced lines. We sincerely hope a short time more will see the work in full swing.

We are again indebted to our many friends for their generous donations during the year. Their gifts include not only money, but supplies of all kinds, and a contribution of time and service in many ways. Among such donors is the real estate firm of Derbes and Roy. They render very valuable assistance with a volunteer automobile service, by means of which convalescent patients are taken home. This service began in August, 1922, and up through December this service handled 136 cases.

On December 15th, 1922, Sister Mary Joseph died in the Hospital after a period of ill health which lasted several years. Sister Mary Joseph had been a faithful and devoted worker in this Hospital for forty-two years, most of which had been spent in the colored wards. She is most affectionately remembered by all those with whom she came in contact, and in her death the Hospital has lost one of its most valued friends.

A change has been made which affects the staff of House Officers. This change will be effective on July 1st. At the present time there are two house surgeons and two medical officers, and their terms are an indefinite length of time. On July 1st an assistant house surgeon will be added to the surgical staff, making a staff of three. Their terms of office will consist of three years. It is to be arranged so that the senior will go out of office, the junior surgeon and assistant promoted to senior and junior respectively and a new assistant taken on each year. The same will hold true of the house medical officers, except that the staff will consist of two members and the term of office will be for two years. It is planned to select the two assistants each year from the class of senior internes if possible. This should be quite an incentive to the internes, and will result in much benefit to the Hospital in every way.

The Hospital is most decidedly to be congratulated on the personnel of its Board of Administrators. They are efficient, loyal and faithful workers, and their co-operation has made it possible to progress unmistakably. These men have the gratitude of the entire staff of the Hospital, and the work they have accomplished will be a perpetual monument to them.

This report would be incomplete without an acknowledgment of the many kind services paid us by the press during the past year. In addition to several editorials, a very generous allotment of space has been granted us in the news columns, and in all other ways we have been dealt with in a fair and unprejudiced manner. We are grateful for the spirit shown by the newspapers, and take this method of showing our appreciation.

In conclusion, on behalf of the Hospital, I wish to express appreciation to the Visiting Staff, the internes, the sisters and nurses, and all other workers for their splendid service and untiring efforts for the Hospital. The success of the Hospital administration depends largely upon them, and the Superintendent acknowledges with gratitude their valuable co-operation.

Respectfully submitted,

WM. W. LEAKE, M. D.
Superintendent.

Report of Superintendent of Clinics

January 30, 1923.

DR. W. W. LEAKE, Supt.

Charity Hospital of Louisiana.

Sir:

We beg to submit for your consideration the annual report of the Charity Hospital Out-Patient Department for the year 1922. During the year 40,640 new patients were admitted, and 133,730 visits were made to the various clinics, with a daily average of 427, as shown in the following schedule:

Service	New Cases	Consultations	Total	Total
			No. Visits 1922	No. Visits 1921
Surgery	11,074	28,458	39,532	34,914
Medicine	6,906	11,278	18,184	13,740
G. U. for Men and Salvarsan..	3,184	21,115	24,299	19,360
G. U. for Women.....	508	1,664	2,172	1,880
Gynecology	2,813	1,588	4,401	3,362
Obstetrics	985	1,567	2,552	2,334
Pediatrics	2,306	4,399	6,705	4,885
Neurology	729	1,790	2,519	1,965
Dermatology	1,413	1,332	2,745	2,784
Ear, Nose and Throat	4,939	5,218	10,157	8,044
Orthopedic	419	773	1,192	1,046
Eye	2,947	9,774	12,721	13,714
Hay-fever	434	3,430	3,864	2,007
Dental	1,983	704	2,687	3,130
Totals	40,640	93,090	133,730	113,165

As will be noted there is a decided increase over the previous year; an increase of 6789 in admission and in total visits an increase of 20,547.

The Department of Surgery had the highest number of admissions, 11,074 with the total number of visits reaching 39,532. In these clinics 5,194 minor operations were performed. The medical clinics increased their total visits 4,444 over the previous year.

Of the individual clinics, the Ear, Nose and Throat, had the largest number of admissions 4,939, referring to the Hospital for operation 1077 patients. The Eye Clinic admitted 2,947 new patients, with total visits of 12,721 and 142 patients referred to hospital for operation.

The Hay-fever Clinic made the greatest gain in numbers; the admissions 434 and total visits 3,864, doubled that of the previous year.

Large gains were made in the Genito-Urinary for men and the Salvarsan Clinic. The total number of visits increased 4,939. During the year 8,061 doses of Arsphenamine were given against 5,512 of the previous year; 275 microscopic examinations were made and 320 patients were referred to the Hospital.

In the Genito-Urinary for women the admissions were slightly lower than in 1921, but the consultations and total visits were considerably higher.

The Gynecology, Obstetrics, Neurology, Dermatology, and Orthopedic Clinics all made substantial gains in admissions and total visits.

The admissions in the Dental Clinics increased but the number of total visits were less.

The number of tests made in the Clinic Laboratory was 13,223 against 8,026 in 1921. 6,755 of these were Wassermann tests.

The number of X-Rays made was 1,977. This does not include the number of X-Ray reports of accident cases referred to the various surgical clinics.

In conclusion we wish to express our sincere appreciation of the generous and efficient work of the visiting staff and their splendid record of attendance; to the sisters, social workers and nurses, for their co-operation and untiring services to our patients; to the employes for their cheerful helpfulness and co-operation.

Respectfully,

SARA BABB, R. N.
Superintendent of Clinics.

To the Board of Administrators, Charity Hospital, New Orleans, La.

STATE OF LOUISIANA

Office of
Supervisor of Public Accounts
Baton Rouge, La.

March 13, 1923.

To the President and Members,
Board of Administrators,
Charity Hospital,
New Orleans, Louisiana.
Gentlemen:

The semi-annual examinations made of the books, accounts and vouchers, of the Charity Hospital, as kept by the Secretary-Treasurer, Mr. Fred W. Matthews, proved that the cash receipts and expenditures of the General and all Special Funds, during the calendar year 1922 were as follows:

Cash Balance, January 1, 1922.....	\$ 3,760.17
Receipts January 1st to December 31st, 1922.....	769,144.51
Total Balance and Receipts.....	\$772,904.68
Expenditures During Same Period.....	718,918.64
Cash Balance, December 31, 1922.....	\$ 53,986.04

Both receipts and expenditures as shown above include transfers from one fund to another amounting to \$21,508.45, so the actual cash receipts and expenditures proper were \$747,636.06 and \$697,410.19 respectively.

Of the above balance \$750.00 was held by the Secretary-Treasurer and \$200.00 by the Sisters to meet petty cash expenditures, while the balance was on deposit in the following banks:

Marine Bank and Trust Co.....\$ 573.05
 Interstate Trust & Banking Co..... 52,462.99

Yours very truly,

W. N. McFARLAND,

Supervisor of Public Accounts.

Pathological Department

January 25, 1923.

To the Superintendent and Board of Administrators,
Charity Hospital of Louisiana,
New Orleans, Louisiana.

Gentlemen:

I have the honor of submitting to your board a detailed comparative statement of the work done by the Pathological Department for the years 1921-22. As will be noted, there is an increase of over seventy-five per cent in the total number of examinations of all types performed during the year 1922. This again stresses the point which I have previously made in a number of my yearly reports—the great importance of a well-organized conducted pathological department in the scientific diagnosis and treatment of patients.

It is indeed with pleasure that I report the establishment of a division of chemistry, which at the present time is prepared to, and actually is, performing all nature of physiological chemical examinations. This final addition of a new division to our laboratory places our present organization on a par with that of the best hospitals in the country.

The division of antitoxin production again shows a healthy increase (over 30%) in the output of tetanus and diphtheria antitoxin. To me, this again proves the wisdom of your board in continuing the functioning of this division, as the cost of the antitoxin consumed in our hospital at the present time, if purchased on the open biological market, would involve an expenditure of at least three times the amount which is appropriated for the operation of our complete department.

In considering the needs of the department for the coming year, I feel that I would be remiss if I did not call attention of your board to the very deplorable conditions under which we are obliged to attempt to save the very valuable records of the department. Due to lack of space these records are not properly arranged, and, therefore, are not available as they should be for the purpose of comparative statistical studies by the various members of our staff. I believe it imperative that arrangements be made to secure some record storage space for the pathological department.

The members of my staff have shown the same unswerving loyalty, conscientious application to their duties and faithfulness to our institution which have characterized them in the past. I desire to thank them for their efforts which have helped me so much in successfully carrying through our endeavors for the year 1922.

Respectfully submitted,

CHARLES W. DUVAL,
Director of Laboratories.

Roentgen Ray Department

X-RAY DEPARTMENT

DR. AMEDEE GRANGER, Director.

February 3, 1923.

Dr. W. W. Leake, Superintendent,
Charity Hospital,
New Orleans, La.

Dear Doctor:

During the past year six hundred and twenty-two (622) more patients were examined, and six thousand, four hundred and sixty-three (6,463) more skiagraphs were made than during the year 1921.

Three more view cabinets have been purchased, making a total of six, and the skiagraphs now numbering one hundred and fourteen, (114) which are exhibited in these cabinets have been carefully selected, grouped, numbered and catalogued, with a view to make this feature of the Department both instructive and interesting, and from the many favorable comments made by those who have viewed them it would appear that we have been successful in our attempt.

Attached to and forming part of this report is a detailed statement of the work done in the Department during the past year.

I wish to take this opportunity to thank you for the interest you have continually shown in this Department and for the advice and co-operation you have at all times so heartily given us.

Yours truly

AMEDEE GRANGER, M. D.,
Director.

Report of the Hay-Fever and Asthma Clinic

New Orleans, January 27, 1923.

Dr. W. W. Leake, Superintendent of
Charity Hospital,
New Orleans.

The Hay-Fever and Asthma Clinic was established in 1918, and has grown steadily in popularity and attendance, so that the number visiting the tri-weekly clinics during the fall hay-fever season of 1922 frequently exceeded 100 patients, including both white and colored. In order to treat so large a number, it was found necessary to make two divisions of the patients which were treated on alternate days.

The reason for the increased attendance is not only that the good results of the immunizing methods are constantly bringing new patients, but that the advantages of preventive immunization are better and understood.

In order to obtain the maximum of benefit to the patient, and the greatest scientific advantages for increasing the successful results, all items that may be of importance in the history of the disease, or for the immunological treatment, are noted in these records, which include the following data:

1. The age of the patient; the age at which the hay-fever developed and its duration. Also sex and color.

2. The months in which the hay-fever attacks are present, as this is a check on the diagnostic tests.

3. The residence, as the locality frequently has an important bearing on the severity of the attacks, and on the corresponding degree of immunity to be attained.

4. Near relatives who have, or have had, hay-fever or asthma.

5. The condition of the nose and any operation that may have been performed.

6. Condition of the chest and heart, pulse pressure, urinalysis.

7. Report of radiograph of chest (Asthma cases only).

8. Complications, such as asthma, bronchitis, affections of the accessory sinuses, ears, throat, eyes and skin.

9. Diagnostic tests, first of the three major and five minor groups of pollen, and afterwards, if required, of other proteins that may form the principal or complicating cause. The results of these tests, indicating the sensitivity of the patient, are recorded on a percentage basis, and form a constant guide for the immunizing doses.

10. On the back of the chart, is a complete record of each dose administered, including the date, number of units of the pollen extract, or the amount of vaccine, and whether this is stock or autogenous; the name of the manufacturer or laboratory which prepared it. Finally special clinical notes, such as the degree of the local or general reaction, dates of seven paroxysms, and the condition of the patient generally.

Such complete data, and based on so large a number of cases necessarily has marked clinical value, which is especially important in hay-fever and asthma, in which the symptoms, course and seasonal variations are so largely influenced by weather and other extraneous conditions. It has enabled us each year to improve our methods and to obtain a higher degree of success as the results of our treatment.

Very sincerely,

WM. SCHEPPEGRELL, M.D.,
Chief of Clinic,

N. F. THIBERGE,
Visiting Surgeon.

Report of the Directress of Nurses

To the Board of Administrators of the Charity Hospital of Louisiana,
New Orleans, La.

Gentlemen:

The year 1922 was a period marked by progress and accomplishment in the School of Nursing. The course of theoretical instruction has been re-arranged in accordance with the revised curriculum of the Louisiana Nurses Board of Examiners. The recent opening of the Physiotherapy Department under its efficient director, Miss Bentley, affords a new field of service for the nurses and strengthens the course considerably. In addition to the theoretic instructions in the class room, the student nurse gets actual experience in the treatment of various cases, so as to correlate instruction with practical experience.

The general course has been improved by the establishment of an elective course which covers a period of the last four months of training. By means of this course the nurse is able to specialize in any branch of nursing which she desires to undertake after graduation.

The special services extended to the nurses in the Laboratory Diet Kitchen, Physiotherapy Department, and various departments of the clinics have been a stimulating feature to women desiring to enter the field of nursing. The extending of the Nursing Service to these various departments created a new demand for nurses. At the instigation of the Hospital Superintendent, nurses are provided for special duty for any sick patients who require constant attention.

Let us not regard our progress with too much complacency, for many needs still remain. Owing to the limited appropriation for the size of our institution and its requirements, and because of the Training School having no separate endowment, we are confronted with the problem as to how our projects on enlarging the Nurses' quarters will develop without sufficient funds.

We are not slow to appreciate the fact that the service rendered the institution from this department stands foremost in practical benefit to the public and the Medical profession. It is not to be questioned, although sometimes difficult to estimate, that the success of the Medical profession depends largely upon nursing service, hence it follows, that the student nurse should be given as much consideration as the medical student.

To the observer, the exterior view of the Nurses' residence is deceiving. It appears spacious and convenient, but many comforts and even necessities are lacking. This statement is justly made after comparing our school to other large Schools of Nursing. The Nurses' Home is crowded beyond its capacity. The building comfortably accommodates 109 nurses. In order to respond to some extent to the many calls for more nurses, we were obliged to improvise more rooms to accommodate them by closing in the three galleries which lodge six nurses, and by placing a bed at the extreme ends of the three corridors. Another bed was added to some of the double rooms and three beds were placed in one of the rooms of the Milliken Memorial, thus increasing our total bed capacity to 124. These figures show that there are 15 beds in excess.

The figures below indicate that applicants have been numerous, but we are unable to accept them on account of the congested condition of the Nurses' Home. With the increasing demands on the nursing personnel, the school cannot perform its function with an average degree of efficiency unless suitable quarters are provided so that more nurses can be added to our ranks. With this urgent necessity in view, we appeal to the Hospital authorities and the public more strongly than ever before to give this vital point serious consideration. Calls for more nurses in the

various departments of the institution are being made daily and Visiting Doctors and House Doctors cannot understand why the school does not respond to this demand. Too much emphasis cannot be laid upon the importance of enlarging the Nurses' Home so that the essential work can be carried on regardless of the general financial condition.

During the past year some of the nurses' rooms have been provided with new furniture. A large mirror was purchased for the main corridor on the first floor. Two rugs were bought for the library and one for the entrance. A beautiful new parlor lamp was added to the entrance. Through the generous policy of Doctor Leake and his keen interest in this department, we were able to secure a number of medical reference volumes for the Nurses' Library by means of a monthly allowance. A rest room was equipped for the night nurses in the Milliken Memorial. Several swings were provided for the lawn for the comfort of the nurses and their friends.

A survey of the 1922 records of illness was made. The average number of days' illness per student per year was four. Since the average number of days' illness per person per year in industry is from six to nine days, this is a good record. I regret to report that tuberculosis has claimed one victim, otherwise the illnesses were insignificant.

In conclusion, we wish to thank the members of the Board for their constant interest in the Training School. We owe a debt of gratitude to Doctor Leake. His splendid co-operation elicits our respect and admiration. Special thanks are due to the Surgical and Medical House Officers for their prompt and devoted attention to our sick nurses. We acknowledge and keenly appreciate the efforts of our Lecturing Staff that so willingly shared the responsibilities in the training of nurses.

Report of Social Service Department

Dr. Wm. W. Leake, Superintendent,
Charity Hospital.

Dear Sir:

The second year of the Social Service Department as an integral part of the hospital has been one of increased activity, the widening scope showing a greater realization of the inter-relationship of the Medical and Social Work.

The function, in part, of the Department has been providing Social and Medical background of the patient, interpreting directions of the Doctors to the patients in their own homes and seeing that the treatment is carried out. Making possible the providing of orthopedic appliances, glasses, special nourishment and financial relief. Arranging for convalescent care. Securing permanent or temporary homes for discharged patients. Giving clinical steering to clients of other social agencies. Obtaining compensation due injured patients. Smoothing over domestic difficulties. In fact, rendering any service to the hospital or patient which will tend to restore the patient or family to normalcy.

The Social Service Department Staff, at present, is composed of four salaried trained Workers and two stenographers. In February, 1922, an additional Worker was added to the Staff, then numbering three. Later, in May, another Worker was added to take the place of one resigning. In August, an assistant stenographer was given the Department. A number of Volunteer Workers gave four hundred and twenty-two hours of service during the year.

A Ford Sedan, added in June, has proven valuable in facilitating the field work as well as the bringing of emergency cases to the clinic. This convenience has been augmented by a Volunteer Auto Service, the courtesy of a business firm, who assisted in the transportation of patients to their homes, trains and clinic.

Through a Volunteer Worker, basketry has been taught in the neurological ward at such times as expedient.

Several crippled children have been given school instruction by a Volunteer and the Social Service Department hopes in the future to obtain from the School Board an instructor for educational advantages for children and youths who must remain in the hospital over a long period, who though physically disabled, can use their minds and hands.

To be of service to the entire hospital with our present Staff is impossible, our policy is to perform a short service to all who need us, concentrating on cases where the Medical or the Social problems are most urgent.

The Workers have been untiring in their devotion to their duties, and it is only through their unselfish work and the splendid co-operation of the Board of Administrators, the Physicians, the Sisters, the Nurses, the Clinical Secretaries and the many Outside Agencies, that we have been able to obtain the results we have.

We are looking forward to the opportunity to do more intensive case work through additions to the Staff.

I am submitting to you the statistical report.

Respectfully,

LAURA BACHMAN,
Head Worker.

Gunshot Wound of Thorax (Penetrating).....	4	11	15				1	5	6				3	6	9
Gunshot Wound of Thorax (Superficial).....	8	14	22	2	6	8	6	8	14						
Gunshot Wound of Toe.....		1	1					1	1						
Incised Wound of Abdomen.....	2	1	3	1		1	1	1	2						
Incised Wound of Arm.....		1	1					1	1						
Incised Wound of Back.....		1	1		1	1									
Incised Wound of Body.....		2	2					1	1					1	1
Incised Wound of Buttock.....		1	1					1	1						
Incised Wound of Face.....	3	5	8	1		1	2	4	6		1	1			

Incised Wound of Foot	1	1		1	1														
Incised Wound of Forearm	1	1				1		1											
Incised Wound of Hand	1	1				1		1											
Incised Wound of Groin		1	1					1	1										
Incised Wound of Leg		1	1					1	1										
Incised Wound, Multiple	1	8	9		3	3		5	5	1		1							
Incised Wound of Neck	1	7	8	1	2	3		3	3							2	2		
Incised Wound of Scalp	1	5	6	1	2	3		2	2		1	1							
Incised Wound About Shoulder		3	3					3	3										
Incised Wound of Thigh	1	1	2		1	1	1		1										
Incised Wound of Thorax	1	2	3	1		1		2	2										
Incised Wound of Throat		1	1		1	1													
Incised Wound About Wrist	1		1				1		1										

Incised and Infected Wounds,
as follows:

Of Abdominal Wall	2	1	3	2	1	3													
Of Face		1	1					1	1										
Of Fingers	1	1	2				1	1	2										
Of Foot	2		2	1		1	1		1										
Of Hand	1		1								1		1						
About Knee	1		1	1		1													
Of Leg	1		1	1		1													
About Shoulder	1		1					1		1									
Of Toes	1		1				1		1										

Stab, or Punctured, Wounds,
as Follows—

Of Abdomen	9	8	17	2	2	4	4	5	9	1		1	2	1	3				
Of Arm		1	1					1	1										
Of Axilla		1	1					1	1										
Of Back (Penetrating)		1	1					1	1										
Of Back (Superficial)	1	4	5		1	1		3	3	1		1							
Of Face	1		1				1		1										
Of Foot	2	1	3	1	1	2	1		1										
Of Head		1	1					1	1										

*Nephritis.

MANNER OF DELIVERY.

Naturally.....	924
By Forceps.....	31
By Version (Some also with Forceps).....	22
By Caesarian Section (7 Mothers Died) (12 Infants Living).....	17
There were 14 Cases of Twin Parturition.	
There was No Case of Triplets.	

MORTALITY AMONG MOTHERS.

There were 24 Deaths among the Mothers, or only 2.41 per cent.

CAUSES OF DEATH.

From Eclampsia (Some admitted in that condition).....	10
From Intercurrent Pneumonia.....	4
From Organic Heart Disease.....	2
From Chronic Nephritis.....	1
From Septic Infection (Attributable to Outside Manipulation).....	2
From Separation of Placenta in Premature Labor.....	1
From Placenta Praevia.....	1
From Embolism Pulmonary.....	1
From Shock (1 Rupture of Uterus; 1 Deformed Pelvis).....	2
	<hr/> 24

The number of Children born was 1008.

Males	527	Delivered Living.....	907
Females	481	Still-Born.....	101
